

Part 1:  $f = xs' + ys$

$x$  and not  $s$  or  $y$  and  $s$

| $x$ | $s$ | $y$ | $f$ |
|-----|-----|-----|-----|
| 0   | 0   | 0   | 0   |
| 0   | 0   | 1   | 0   |
| 0   | 1   | 0   | 0   |
| 0   | 1   | 1   | 1   |
| 1   | 0   | 0   | 1   |
| 1   | 0   | 1   | 1   |
| 1   | 1   | 0   | 0   |
| 1   | 1   | 1   | 1   |

## Part II

$$f = (a+b)' + cb'$$

not (a or b) or (not b) and c

$\Rightarrow$  (not a and not b)

| $a$ | $b$ | $c$ | $f$ |
|-----|-----|-----|-----|
| 0   | 0   | 0   | 1   |
| 0   | 0   | 1   | 1   |
| 0   | 1   | 0   | 0   |
| 0   | 1   | 1   | 0   |
| 1   | 0   | 0   | 0   |
| 1   | 0   | 1   | 1   |
| 1   | 1   | 0   | 0   |
| 1   | 1   | 1   | 0   |

3.

$$f = b'(c + a')$$

| a | b | c | f |
|---|---|---|---|
| 0 | 0 | 0 | 1 |
| 0 | 0 | 1 | 1 |
| 0 | 1 | 0 | 0 |
| 0 | 1 | 1 | 0 |
| 1 | 0 | 0 | 0 |
| 1 | 0 | 1 | 1 |
| 1 | 1 | 0 | 0 |
| 1 | 1 | 1 | 0 |
